

Pack Handling System

# MV-70

### **MV-70-C**

Specific requirements in the pharmaceutical industry require a variable marking solution. The MV-70 offers just that with its variety of options and impressive functionality. Its open design allows a wide variety of marking systems to be used. Optionally, up to two different print positions can be set up, permitting – simultaneous – printing of the front and the back of a folding box. Its wide range of features and its versatility make the MV-70 the ideal solution for the most demanding requirements for secure marking of folding boxes in the packaging line.

## Technical data

<b>Machine efficiency</b>	up to 400 pcs/min
<b>Belt speed</b>	max. 60 m/min (depending on printer)
<b>Conveying system</b>	Top/bottom belt
<b>Machine direction</b>	left to right
<b>Marking systems</b>	prepares for TIJ, CIJ, DOD and laser, other printers upon request
<b>Air pressure</b>	6 bar
<b>Voltage / frequency</b>	100 ... 240 V AC / 50–60 Hz / 0,7 kW
<b>Dimensions</b>	870 x 1470 x 2175 mm
<b>Weight</b>	approx. 380 kg

## Optional

Vignette labelling of top side

Open flap detection

### Convincing highlights:

- Secure Pack Handling System
- One user-friendly operating panel to control all modules
- Space savings due to slim dimensions
- Front and back can be printed (simultaneously if required)
- Extensible with modules
- Simple maintenance due to GMP-compliant design
- Format adaptation without tools

### **MV-70-F 160 TL**

This member in the MV-70 product line is perfectly suitable if, in addition to unique marking, vignettes or certificates of originality must be placed on the folding box. While a built-in two-sided labeller secures both opening tabs with label seals, another labeller can provide the top of the folding boxes with vignettes (MV-70-F 160 VL TL). A centrally operated touch panel and the GMP-compliant design make the MV-70-F an extremely user-friendly marking solution with labelling functionality.

## Technical data

<b>Machine efficiency</b>	up to 400 pcs/min
<b>Belt speed</b>	automatic synchronization of belt speed and object transfer
<b>Conveying system</b>	lower guide for precision transport
<b>Machine direction</b>	left to right
<b>Marking systems</b>	prepared for TIJ, CIJ, DOD and laser, other printers upon request
<b>Air pressure</b>	6 bar
<b>Voltage / frequency</b>	200 ... 240 V AC / 50–60 Hz / 1,0 kW 100 ... 130 V AC / 50–60 Hz / 1,3 kW
<b>Dimensions</b>	1600 (2218 laser) x 1410 x 2340 mm
<b>Weight</b>	approx. 800 kg

## Optional

Vignette labelling of top side

### Convincing highlights:

- Built-in two-sided labeller for safety seal
- Precise product guiding due to studded belt
- Printing on front, back and top sides
- Convenient label changes

### **MV-70-F + Checkweigher**

This MV-70 solution combines high-precision checkweighing technology from Sartorius Intec with reliable Mark & Verify technology from Laetus. The dynamic checkweigher is a quality assurance component and ensures that the contents of the folding boxes are complete. Is the simultaneous application of vignettes and originality seals required? No problem. The MV-70-F + checkweigher can easily be extended with labelling functionality. The reliable all-in-one solution for secure packaging control.

## Technical data

<b>Machine efficiency</b>	up to 250 pcs/min
<b>Belt speed</b>	automatic synchronization of belt speed and object transfer
<b>Conveying system</b>	lower guide for precision transport
<b>Machine direction</b>	left to right
<b>Marking systems</b>	prepared for TIJ, CIJ, DOD and laser, other printers upon request
<b>Air pressure</b>	6 bar
<b>Dimensions</b>	2425 x 1410 x 2340 mm
<b>Weight</b>	approx. 880 kg

## Optional

Vignette labelling of top side

### Convincing highlights:

- Printing on front, back and top sides
- Built-in two-sided labeller for safety seal
- User-friendly operation of machine, printer and control camera from a central touch panel
- GMP-compliant design permits easy access to all machine parts
- Prepared for different printing systems and technologies
