Laetus UP – new software platform for more flexible and slimline packaging processes

Laetus, May 2017. At interpack 2017, Laetus will be presenting its innovative technology platform for even more slimline packaging processes and supply chains for the first time. It has been designed for use in the pharmaceutical, medical technology, and food industries. Laetus UP (Laetus Unified Platform) unifies the user interfaces of applications such as serialization, aggregation, and a wide range of optical inspections and is characterized by simplified processes and ease of use.

Once configured in Laetus UP, control parameters are available to all applications downstream of the platform. This makes it possible to carry out an "on-the-fly batch changeover": even as the final shipping cartons from the previous batch are approaching the end of the packaging line, the operator can start the next order at the start of the packaging line. This fast changeover minimizes downtimes and changeover times on the packaging line considerably.

A plant server can be used to make the application even more flexible, whereby different packaging orders can be processed in parallel on separate lines. The new clear and user-friendly Graphical User Interface (GUI) makes it easy to input data, which is also possible on mobile devices using an app.

What makes the modular platform really stand out is the fact that it can be used to control any number of components, including those that are already installed, such as cameras, printers, scanners, and scales, from any manufacturer. A Level 4 connection to all standard ERP/MES systems can be established as required.

In the first step of the product launch, the software for the serialization and traceability of products will be delivered. In further migration steps, Laetus solutions for optical control in the packaging process will be harmonized.

Laetus UP

Laetus UP – An innovative platform for slimline packaging processes

About Laetus

Founded in 1974, Laetus is an industry leader in inline quality inspection systems with thousands of successful installations of its renowned ARGUS, POLYPHEM, and INSPECT solutions across identification, fill inspection, and other quality control applications. With its Secure Track and Trace Solution (S-TTS), Laetus is also a leader in developing robust supply chain solutions for the Pharmaceutical, Medical, Cosmetics and FMCG industries enabling the requirements of all regulations regarding anti-counterfeiting to be fulfilled. Laetus partners with its customers to address their unique serialization and traceability requirements. Laetus has sold more than 18,000 systems across the globe including more than 42,000 Laetus cameras and sensors. Headquartered in Alsbach-Hähnlein, Germany, Laetus has significant scale to address the needs of customers worldwide with some 250 employees and direct sales and engineering operations in France, Germany, Italy, Spain, UK, the US, China, South America, and Mexico. In addition, Laetus has an extensive network of valued channel partners that extend Laetus' technical expertise in another 40 countries. In December 2015 Laetus has been acquired by Danaher. It operates as an independent business within the Product Identification Platform.
